PROFESSIONAL EXPERIENCE:

Frontend Developer Internship, Ultraverse

12/23 - Current

- Transformed a completely static HTML, CSS, JavaScript, and React single-page application into an interactive user interface using animations, transitions, and carousels
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination, and dynamic routing
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment

Projects:

Anime Explorer: <https://anime-search-red.vercel.app/>

- Developed a responsive Anime Search Engine using React, harnessing data from a third-party API to provide users with real-time information on a vast array of anime titles.
- Integrated dynamic rendering of search results, optimizing performance and user engagement, while ensuring a visually appealing and intuitive interface for anime enthusiasts.

Treacht: <https://week2-1-1scale.vercel.app/>

- Designed and implemented the user interface focusing on responsive design, ensuring optimal viewing on various devices.
- Utilized Flexbox to create a visually appealing layout and enhance user experience.
- Implemented interactive features, allowing users to interact with the 1:1 scale object and explore its details.
